RETIREMENT GOAL-SETTING WORKSHEET

As you develop a retirement strategy, consider all your sources of retirement income, including your WRS pension benefit, Social Security benefits, and your personal savings and investments. This worksheet is designed to help you estimate how much retirement income Social Security and your employer-sponsored pension benefit(s) will provide, and how much you need to provide through the Deferred Compensation Plan and other investments in order to achieve financial security during retirement.

							You	Examp
A. What is your current annual income before taxes? B. What percentage of your current income will you need during retirement? Many financial advisers suggest you will need at least 70% to 90% of your current income, depending on family medical history, how active you plan to be during retirement, etc. You may want to target 100% or more if you are young or have not reached your prime earning years as this worksheet is based only on current salary.								\$30,00
								90%
C. Multiply row A by row B. Example: \$30,000 x .90 = \$27,000								\$27,00
rep 2: How mu	uch retireme	nt income cou	ld Socio	al Security	provide?			
Many financial adv	visers say Social	Security may repla	ace only 2	0% to 40% o	f your current	t income.		
The Social Security Administration provides the guidelines listed in the table. *Based on a birth date of 9/3/1959. Source: Social Security Administration benefit calculator, Feb. 2011. For a more accurate estimate, call the Social Security Administration at 1-800-772-1213 or visit http://www.ssa.gov.				rent Annual Income	Percentag Security m at age	ay replace		
				\$20,000	3	38%		30%
				\$50,000	2	27%		
ocial Security may und	dergo changes in	the future. It is up to		\$70,000	2	21%		
you to decide how much to rely on it when considering income you may need during retirement.				\$100,000	1	7%		
E. Multiply row A by row D. Example: \$30,000 x .30 = \$9,000								
walupiy row A by	row D. Example: S	\$30,000 x .30 = \$9,	000					\$9,00
		\$30,000 x .30 = \$9, nt income cou		pension p	provide?			\$9,00
